

## WORK EXPERIENCE

### Big Ten Network (FOX) | Chicago, IL

#### Designer | 2017-Present

I've been working for BTN as a fulltime freelance motion graphics artist helping create on-air graphics for live and studio shows. I have helped brand new shows and segments as well as creating unique graphics and animations for existing ones. Primarily working in After Effects and Photoshop, my work in the design department at BTN is also where I've been cutting my teeth on Cinema 4D.

### RPM Advertising | Chicago, IL

#### Motion Graphics Designer | 2012-2017

A master class in motion graphics, my five years at RPM allowed me to ramp up my skills in After Effects, Photoshop, InDesign, and Cinema 4D. I climbed the ranks from a production artist responsible for resizing existing motion, print, and web ads, to a motion graphics designer as a part of RPM's Digital Department. I was responsible for creating animated ads that were used through some of the top 10 highest grossing casinos in America, as well as for creating video campaigns and social media content for a variety of clients.

### York and Chapel | Milford, CT

#### Designer and Motion Graphics Artist | 2011-2012

I was taken on as a junior designer helping to develop and implement brand standards, design logos and typographic layouts, retouch photos, and create print ads. I introduced motion graphics and video production to their digital department and created animations that were featured on the Toys "R" Us digital billboard in Times Square, NYC and in celebrity product pitches to Walmart.

### Design Center | Storrs, CT

#### Designer and Motion Graphics Artist | 2010

In college I was part of a student run, fully-functional design studio at The University of Connecticut. We worked independently and in small groups, and were responsible for providing creative graphic design solutions for real world clients.

### Academic Keys | Storrs, CT

#### Designer and Illustrator | 2009-2010

I was taken on to run the design department at a career job-posting-site for college professors across the world. I was responsible for designing and animating banner ads, writing and illustrating comics, and creating instruction manuals for their site.

### Barker Specialty | Cheshire, CT.

#### Production Artist to Jr. Designer | 2007

I was taken on as an intern and was later promoted to a paid junior designer. I was responsible for creating, reworking, and re-sizing logos and typography for promotional products, websites, brochures, and catalogs, for clients ranging from local businesses to Disney.

## EXTRAS

### Freelance

Outside of my full time jobs, I have provided my creative services as a motion graphics artist, graphic designer, or musician for a variety of clients. Including Jujimufu, 2019's World's Strongest Man - Martins Licis, Game Grumps, Bestman, as well as John Mingione with 106.1 WBLI and WNEW 102.7. I've also freelanced with the Creative Group and Creative Circle for a variety of Chicago companies.

### Cromagg | Youtube

#### Content Creator | 2013-Present

As a passion project, I run an online animation channel called "Cromagg" where I write, animate, voice, and score animated cartoons as a part of the Frederator Network.

## EDUCATION

### University of CT, Storrs, Class of 2011

I graduated in the Winter of 2011 from the School of Fine Arts with a major in Communication Design with a dual concentration in Printmaking.
